

# DigitalFilmArchive

## DIGITAL DOCUMENTS LARGE SIZES

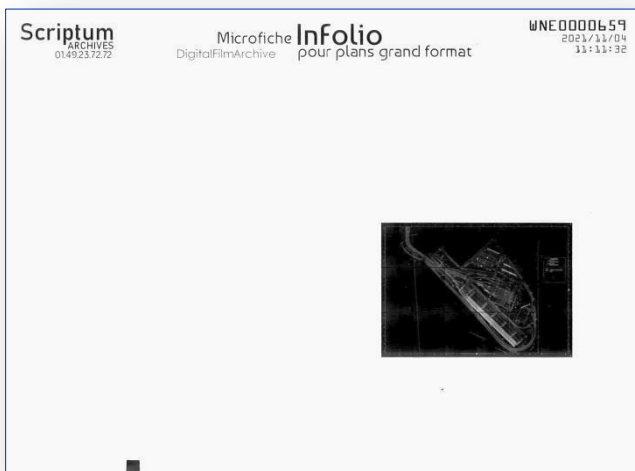

The DigitalFilmArchive system ensures the perennation of large size digital documents, using three innovative microfiches :

**InFolio Microfiche**  
Matrix plans

**InPlano Microfiche**  
Vector plans

**InExtenso Microfiche**  
Elongated plans

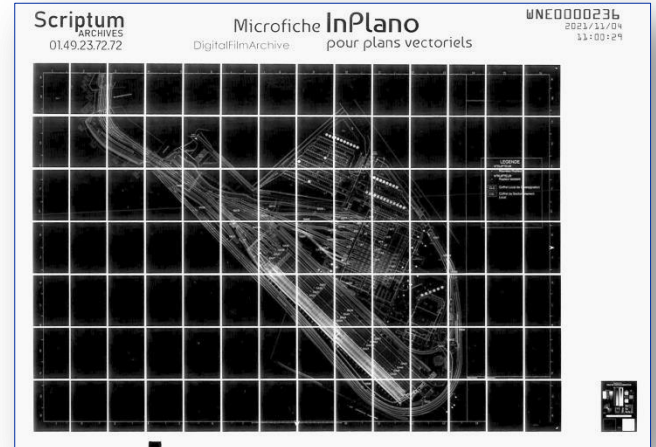

These three micrographic creations integrate the uses now in force in the technical drawing field, where we see the multiplication of elongated formats, and vector plans which contain details so fine that they are not discernible at 1/1 scale.

**InFolio Microfiche**  
for matrix or vector plans, from A2 to A0  
This microfiche is equivalent of the "Aperture card"  
but in A6 format and on polyester support.  
*Exploitation in optics, or by digitization*

### InPlano Microfiche for complex vector plans

The InPlano microfiche is an exploded reproduction of a vector plan containing details that need to be "zoomed in"  
*Optical exploitation, or digitization image by image*

**InExtenso Microfiche**  
for elongated formats

### InExtenso Microfiche for elongated formats

This microfiche supports extended formats  
up to triple A0 (841 x 3567 mm)  
*Optical exploitation, or sweep digitization*
